

Announcing the 4th International Partners in Flight Conference

Tundra to Tropics: Connecting Birds, Habitats, and People

13-16 February 2008
McAllen Convention Center
McAllen, Texas

The scientific program will focus on linking conservation actions between breeding and non-breeding ranges of migratory birds and on the overlap between the needs of wintering migrants and high priority endemics in the Caribbean, Mexico, Central and South America.

Mark your calendars now and watch the PIF web site (www.PartnersInFlight.org), listservs, and newsletters for details as they develop.
